**SPICY RENTAL 滑雪租赁店**

**探访指数：4.7 / 5.0 | 从木质山室走向雪场**

## 空间故事

- **从山谷尺度开始：** 抵达竜王山岳度假区（龙王山岳度假区）后，不要立刻把注意力收紧到店面。先站在信息中心附近的公共区域观察银灰色新体量、既有黑色与棕色建筑、停车场和远处山脊的叠合关系。屋脊高于普通单层商店，却没有压过山景，这种介于设备用房与山地公共建筑之间的尺度，是项目最重要的外部判断。
- **沿入口读屋面：** 从北侧与东北侧接近建筑，可以辨认看似单坡的轮廓其实由高低错接的屋面构成。观察入口处被抬高的立面、竖向金属板和狭长玻璃如何共同建立方向感，再对照剖面图确认超过六米的屋脊、地面高差和室内最高空间之间的关系。
- **跟随装备动线：** 进入营业中的租赁店后，以正常顾客身份沿接待、试穿、领取和出口移动。平面中的折转并不复杂，真正组织流线的是地坪、台阶、坡道、长凳和货架的连续高差。把每次抬升或下降对应到使用动作，便能看出坡地基础怎样变成无需文字解释的导向系统。
- **比较昼夜两种山室：** 白天留意高处狭长开口把自然光压成柔和光带，刨花板表面呈现接近浅色岩层的颗粒；傍晚则观察点状灯光如何加深空间纵深，使木质界面包裹接待台、鞋架和人群。若条件允许，可在同一天分别体验营业初段与返程时段，比较期待上山和结束活动两种心理状态。

## 旅人行囊

- **最佳季节：** 建筑全年作为度假区设施的一部分存在，但完整体验与冬季滑雪运营关系最紧密。竜王滑雪公园公布的 2026—2027 冬季计划从 2026 年 12 月 5 日开始，具体雪况、缆车、租赁与夜场安排仍应在出发前查看官方更新。非雪季适合观察外部体量和山谷关系，却未必能进入租赁流程。

- **材料练习：** 选择一段完整墙面，记录刨花板颗粒、错缝拼接、深色结构柱和灰色地毯之间的尺度差异。再转向外部竖向金属板，比较两种经济材料如何分别处理雪水、碰撞、光线与触感。项目的高级感并不来自昂贵表面，而来自材料被连续而精确地使用。
- **摄影建议：** 外部适合用中广角同时纳入建筑与山脊，避免只拍正面招牌；暮色时保留天空亮度，让室内暖光成为体量的深度线索。室内应避开租赁高峰，不阻挡试穿、归还和出口通道，也不拍摄可识别的顾客面部。狭长开口和纵深通道适合竖幅构图，整体租赁区则适合较低机位。
- **顺道探索：** 把 SPICY RENTAL 与索道上方的 SORA terrace（天空露台）安排为同一条线路，可以从山脚租赁空间一路比较到高处观景设施。若增加温泉体验，可转往汤田中温泉或涩温泉；冬季交通受积雪与接驳班次影响，应以度假区和当地交通部门当天公告为准。

**交通与住宿建议**

- **抵达：** 度假区地址为长野县下高井郡山之内町夜间濑 11700。自驾可从上信越自动车道信州中野交流道方向进入，冬季必须按雪况准备冬季轮胎或防滑链。公共交通通常以长野站或长野电铁汤田中站为转换点，接驳安排会随季节调整，预订前应核对官方 Access 页面。
- **现场移动：** SPICY 位于信息中心与山脚设施附近，租赁、票务和上山动线可以在步行范围内完成。携带相机时，将雪具与摄影器材分开收纳，避免在湿滑入口打开行李；先完成租赁和寄存，再以轻装观察建筑，会比在高峰人流中反复停留更安全。
- **营业节奏：** 官方设施页当前列出的 SPICY 营业时间为 8:00—17:00，但雪季、夜场、天气和维护都可能改变实际开放。想观察自然光可在上午较早时进入；想体验暖光与归还高峰，可在下午结束滑行前后短暂停留。建筑是正常运营的商店，拍摄和停留必须服从工作人员安排。

- **住宿选择：** 希望清晨直接进入雪场，可选择竜王高原及山脚接驳范围内住宿；希望把温泉街和餐饮纳入行程，可住在汤田中或涩温泉一带，再按当季班次往返。周末和降雪后的热门日期应提前预订，并确认住宿是否提供接驳、雪具寄存与冬季道路信息。

**探访建议：把建筑体验安排在正常滑雪行程之中，以顾客身份完成接待、试穿、领取和前往雪场的流程。上午观察自然光，傍晚比较木质界面在暖光下的洞穴感；先服从运营与人流，再进行拍摄。冬季开放、雪况、缆车和接驳随天气变化，出发前应同时核对度假区设施页与交通页。**

**SPICY RENTAL**

**Visit Index: 4.7 / 5.0 | From a timber mountain room to the slopes**

## Spatial Story

- **Begin at valley scale:** On arrival at Ryuoo Mountain Resort, resist narrowing the view immediately to the shopfront. From public space near the information centre, compare the new silver volume with the existing dark buildings, parking area and distant ridge. The roof rises beyond an ordinary one-storey store without competing with the mountain, establishing a scale between service building and small civic room.
- **Read the roof from the entrance:** Approach from the north and northeast to see that the apparently simple mono-pitch outline is made from overlapping roof planes. Study how the raised entrance facade, vertical metal seams and tall glazing establish direction, then use the section to connect the ridge of more than six metres with changes in ground level and the tallest interior zone.
- **Follow the equipment sequence:** When the shop is operating, move as an ordinary customer through reception, fitting, collection and the exit. The plan is not complicated; changes in floor, step, ramp, bench and shelving organise the route. Match each rise and descent to a practical action to understand how the sloping foundation becomes wayfinding without excessive signs.
- **Compare two mountain rooms:** By day, narrow high openings compress natural light into soft bands and make particleboard resemble pale strata. At dusk, point lighting deepens the interior and wraps reception desks, boot racks and visitors in a warmer enclosure. If possible, experience

an early operating period and the return hour on the same day to compare anticipation before the mountain with shelter after it.

**Traveler's Toolkit**

- **Best season:** The building remains part of the resort setting throughout the year, but its full spatial sequence belongs to winter ski operation. Ryuoo's published 2026–27 winter plan begins on 5 December 2026; snow, lifts, rental and night-skiing schedules should still be checked immediately before travel. Outside winter, exterior massing may be visible while the rental sequence may not operate.
- **Material exercise:** Select one continuous wall and record particleboard chips, staggered joints, dark columns and grey carpet at different scales. Then compare them with the vertical metal skin outside. The project's refinement comes from the consistent and precise use of economical materials rather than expensive finishes.
- **Photography advice:** Use a moderate wide angle outdoors to hold both building and ridge, rather than isolating the sign. At dusk, retain brightness in the sky so warm interior light reveals depth. Indoors, avoid rental peaks, circulation and identifiable guests. Vertical frames suit slit windows and passages; a lower horizontal viewpoint suits the overall rental hall.
- **Nearby route:** Combine SPICY RENTAL with the ropeway and SORA terrace to compare a base-area service room with a high-altitude viewing facility. Yudanaka or Shibu Onsen can extend the route into a thermal-bath stay. Winter travel is sensitive to snow and shuttle changes, so use same-day resort and transport notices.

**Getting There & Where to Stay**

- **Arrival:** The resort address is 11700 Yomase, Yamanouchi, Shimotakai, Nagano. Drivers approach from the Shinshu-Nakano interchange and need winter tyres or chains according to conditions. Public-transport journeys commonly transfer through Nagano or Yudanaka Station, but seasonal shuttles change; confirm the official Access page before booking.
- **On-site movement:** SPICY is near the information centre and base facilities, keeping rental, ticketing and slope access within walking distance. Separate camera equipment from wet snow gear, complete rental and storage first, and then study the architecture lightly equipped. This is safer than repeatedly stopping in peak circulation with open luggage.
- **Operating rhythm:** The resort facility page currently lists SPICY at 08:00–17:00, but season, night operation, weather and maintenance may alter access. Morning favours natural light; the late afternoon reveals warm lighting and the return flow. It remains a working shop, so staff directions take priority over photography.
- **Where to stay:** Stay around Ryuoo and its base shuttle area for direct morning access. Choose Yudanaka or Shibu Onsen to combine the visit with baths and restaurants, then travel according to the current seasonal timetable. Reserve early for weekends and fresh-snow periods, and confirm shuttle, gear storage and winter-road support with the accommodation.

**Visit Advice: Experience the building through its normal rental sequence, prioritise operations and visitors, compare daylight with the warm return-hour atmosphere, and verify snow, lifts and transport immediately before travel.**
