

旅游探访指数 - HarPie 住宅

总分：3.5/5.0 (扎根于加拿大岩地上的木石庇护所)

1. 私密性与可达性: 这是一座位于加拿大魁北克省旺特沃斯湖畔的私人住宅，建筑面积近六百平方米。由于其作为私人住所的属性，建筑内部并不对公众开放。它巧妙地隐匿在湖岸与道路之间的狭长地带，凭借地形高差在喧嚣与宁静间划出了一道清晰的私密界限。

2. 顺应地形的体量布局: 加拿大本土的建筑团队将整座住宅拆解为三个独立体量，沿着从共享到私密的轴线排布。它们稳稳地坐落在一块宽大的石基之上，仿佛是从崎岖的岩地里自然生长出来的一般。面向道路的一侧刻意保持内敛和封闭，而起居空间则毫无保留地向湖面敞开，让湖景成为日常生活的核心。

3. 对传统木屋的现代转译: 建筑师没有盲目照搬传统的乡土小木屋，而是提取了坡屋顶、天然材料等本质元素，用极其克制和现代的语言进行了重新表达。室内大量使用温润的木材与粗粝的石材，辅以经过精准计算的光线开口，打造出了一个能抵御广阔荒野的温馨庇护所。

探访指南

- **最佳方式:** 强烈推荐你通过专业的建筑摄影图集进行云端赏析。重点观察建筑底部的石质基座与上方轻盈的木质体量是如何形成视觉张力，并完美融入周边冷峻的自然环境中的。

- **看点:** 细细品味建筑师对传统木屋原型的当代解构——看他们如何利用被动式建筑标准，用纯粹的材料和内敛的立面，将一座庞大的现代住宅化作地景的一部分。
- **项目周边顺带探访推荐:** 既然你来到了魁北克省的湖区，强烈推荐顺道探访蒙特利尔周边的皇家山公园或劳伦琴山脉。如果对当代建筑感兴趣，也可以驱车前往蒙特利尔市区，参观著名的六十七号栖息地，那座由层叠方块组成的野兽派建筑经典，将为你带来与这座内敛湖滨住宅截然不同的视觉震撼。

一句话总结: 它用石砌的基座和极简的木质坡屋顶，在加拿大凛冽的湖畔岩地上，重新定义了当代木屋的静谧与克制。

Travel & Visit Index - HarPie Residence

**Total Score: 3.5/5.0 (A Timber and Stone Sanctuary
Rooted in Canadian Bedrock)**

1. Privacy & Accessibility: Located on the shores of Lake Wentworth in Quebec, Canada, this is a private residence covering nearly 600 square meters. Due to its nature as a private home, the interior is not open to the public. It is cleverly hidden on a narrow strip between the lakeshore and an access road, utilizing the natural topography to draw a clear line of privacy between noise and tranquility.

2. Topography-Responsive Volume Layout: The local Canadian architectural team deconstructed the house into three distinct volumes, arranged along a gradient from communal to private spaces. They rest firmly on a broad stone plinth, appearing to grow naturally from the rugged bedrock beneath. The road-facing side remains deliberately restrained and closed off, while the living spaces open generously toward the water, making the lake the core of daily life.

3. Modern Translation of the Traditional Cabin: Rather than blindly copying traditional vernacular log cabins, the architects extracted essential elements like pitched roofs and natural materials, re-expressing them in an extremely restrained and modern language. The interior makes extensive use of warm timber and rugged stone, complemented by precisely calculated light openings, creating a cozy sanctuary that offers refuge from the vast wilderness.

Visitor Guide

- **Best Way to Visit:** A digital appreciation through professional architectural photography is highly

recommended. Focus on observing the visual tension between the stone plinth at the base and the lighter timber volumes above, and how they perfectly blend into the stark surrounding natural environment.

- **Highlights:** Carefully savor the architects' contemporary deconstruction of the traditional cabin archetype—observe how they utilized Passive House standards, pure materials, and restrained facades to turn a massive modern residence into an integral part of the landscape.
- **Recommended Nearby Visit:** Since you are in the lake region of Quebec, it is highly recommended to visit Mount Royal Park or the Laurentian Mountains near Montreal. If you are interested in contemporary architecture, you can also drive into downtown Montreal to visit the famous Habitat 67, the Brutalist classic composed of stacked blocks, which will provide a starkly different visual impact compared to this restrained lakeside home.

One-Sentence Summary: With a stone plinth and minimalist pitched timber roofs, it redefines the tranquility and restraint of the contemporary cabin on the frigid, rocky shores of

Canada.
